PROFESSIONAL SUMMARY

Visionary front-end architect and senior technology leader with 18+ years of experience engineering mission-critical digital platforms at global scale. Recognized for translating complex technical challenges into high-impact business outcomes across the digital health, e-commerce, and consumer technology sectors. Career defined by delivering transformative systems at organizations including Google, Target, and Castlight Health — platforms that collectively serve hundreds of millions of users, support national public-health infrastructure, and drive billions in commercial revenue.

Combines deep architectural expertise with executive-level strategic thinking — equally adept at setting technical vision, governing engineering standards across distributed teams, and driving measurable organizational outcomes. A published researcher with 15 peer-reviewed publications and 3 technical articles on DZone (5.3K+ views), invited judge at 8 international IEEE and scholarly conferences, and a recognized voice in AI, cybersecurity, and modern web engineering.

- **National-Scale Impact:** Spearheaded Curelight — a vaccine-finder and inventory platform integrated with CDC Vaccines.gov — that reached 100M+ users since 2021, directly supporting U.S. government COVID-19 pandemic response across 50,000+ healthcare providers and 14 major pharmacy chains.
- **Google Engineering Leadership:** Headed an 8-member engineering team at Google, orchestrating delivery of the Maps social-commerce layer, Google My Business features, Stadia & Chromecast streaming surfaces, and gTech Ads automation systems — transforming consumer and business-facing product experiences at global scale.
- **Billion-Dollar Commerce Transformation:** Drove the front-end engineering strategy for Target's \$1.8B Everest Redesign — the largest digital re-platforming in Target's history — delivering the core transaction engine that reversed high cart-abandonment rates and elevated checkout completion within six months of launch.
- **Thought Leadership & Scholarly Recognition:** Author of 15 peer-reviewed publications and 3 DZone technical articles (5.3K+ views) in AI, cybersecurity, and digital health; invited judge evaluating 53+ submissions across IEEE Future Networks World Forum, IEEE SysCon, 3ICT, and 5 other international conferences; IEEE Senior Member (top ~10% globally), IETE Fellow, Sigma Xi, NSPE.
- **Certified Google JavaScript Code Reviewer** — one of a select group formally recognized by Google for upholding engineering quality, accessibility, and code-review authority across globally distributed teams.

CORE TECHNICAL COMPETENCIES

Architecture	Front-end architecture, design systems, micro-frontends, Module Federation, SSR/SSG, component-driven development, cross-platform web & hybrid mobile	Frameworks	React, Next.js, Angular, Ionic, VueJS, Google Wiz, Material Design, jQuery, Storybook, Redux, RxJS, D3.js, Lit, Express
Languages	JavaScript (ES2015+), TypeScript, HTML5, CSS3/SASS/SCSS, Python, PHP, Java, SQL	Build & Tooling	Webpack, Webpack Module Federation, Vite, Nx, Turborepo, Babel, ESLint, Prettier, Rollup, esbuild, PostCSS

CSS Architecture	BEM, SMACSS, ITCSS, OOCSS; CSS Modules, CSS-in-JS (Styled Components, Emotion); Tailwind CSS; CSS Grid, Flexbox; CSS Custom Properties, Design Tokens, Style Dictionary	Animation & Motion	GSAP, Framer Motion, CSS Animations & Transitions, Lottie (JSON animations), Web Animations API; micro-interactions, skeleton screens, loading states, scroll-driven animations
Design Tokens & Theme	Design token pipelines, CSS Custom Properties, dark mode & theme switching, multi-brand theming, Style Dictionary, Figma Tokens; design-to-code workflow	Web Standards & APIs	Web Components, Custom Elements, Shadow DOM, HTML Templates; SVG manipulation, Canvas API; Web Workers, Service Workers, PWA; WebSockets, IndexedDB
Accessibility (A11y)	WCAG 2.0 / 2.1 / 2.2, ARIA, Screen readers (NVDA, VoiceOver, JAWS), axe-core, colour contrast compliance, keyboard navigation, focus management, inclusive design, HIPAA-aligned UX	Performance	Core Web Vitals (LCP, CLS, INP), Lighthouse, CrUX, WebPageTest; lazy loading, code splitting, tree shaking, bundle analysis, image optimisation, CDN strategy, caching
Cross-Browser	IE6+ through modern evergreen browsers; polyfills, graceful degradation, progressive enhancement, CSS hacks, legacy JS patching; BrowserStack, Fiddler, DevTools, responsive & cross-device testing	Testing & Quality	Jest, Cypress, Playwright, Jasmine, Karma, Vitest, Testing Library; TDD, BDD, Unit / Integration / E2E, visual regression testing, CI/CD test automation
i18n & Globalisation	react-i18next, i18next, RTL (right-to-left) layouts, locale-aware date/number/currency formatting, multi-language content strategy, CLDR, Unicode handling	UX & Research	A/B testing, heatmaps (Hotjar, FullStory), usability testing, user journey mapping, UX prototyping (Figma, Adobe XD, InVision, Zeplin), interaction design, SEO
Back-end & Data	Node.js, Express, Python (FastAPI/Flask), PHP; MySQL, PostgreSQL, MongoDB, BigQuery; REST, GraphQL, gRPC; API design & integration	Cloud & DevOps	GCP, AWS (S3, Lambda, CloudFront), Docker, Kubernetes (basics), GitHub Actions, Jenkins, CI/CD pipelines, Git, Nx Cloud
AI Developer Tools	Claude (Anthropic), Cursor IDE, Google CLI / Gemini CLI, GitHub Copilot, ChatGPT; LLM API integrations, AI-assisted UI generation, AI-powered code review	Analytics & CMS	Google Analytics 4, Adobe Analytics, Tealium, TeamSite, Drupal, WordPress, Contentful; structured data, Open Graph, performance monitoring
Leadership	Technical vision & architecture governance, Agile/Scrum (Scrum Master), Google JS Code Review (Certified), cross-functional team leadership (8+ members), mentoring, roadmap planning	Project Delivery	End-to-end product delivery, risk management, resource planning, client relationship management, vendor coordination, requirement analysis, stakeholder communication

PROFESSIONAL EXPERIENCE

Senior Software Engineer III (Front-End Architect) — Castlight Health, Inc. — San Francisco Bay Area, CA Apr 2020 – Present

Castlight Health is a digital-health navigation platform named one of the World's Top HealthTech Companies (TIME, 2025), serving large employer-sponsored populations through provider discovery, vaccine access, and benefits experiences.

- Lead front-end engineering and architecture for enterprise digital-health web and hybrid-mobile applications supporting millions of employer-sponsored users.
- Architected Curelight, a national vaccine-finder and provider-inventory platform integrated with CDC Vaccines.gov; public-facing search tool reached 100M+ visitors since Jan 2021, supporting COVID-19 public-health response.
- Designed vaccine and return-to-work platforms handling millions of daily transactions at sub-24-hour latency across 50,000+ healthcare providers, 14 pharmacy chains, and hundreds of enterprise employers.
- Built secure identity, scheduling, and personalization systems that improved application reliability by 45%+ and cut enterprise onboarding time by two-thirds.
- Own scalable UI architectures, reusable component libraries, and micro-frontend patterns improving modularity, WCAG accessibility compliance, and developer velocity.
- Provide technical leadership through mentoring, code review, architecture governance, and roadmap planning in collaboration with product, UX, backend, and data-science teams.

Technical Architect → System Architect — Google (Vendor through HCL Technologies Ltd.) — Mountain View, CA & Hyderabad, India *Jul 2014 – Apr 2020*

Google — one of the world's most valuable technology companies. Engaged as vendor through HCL Technologies Ltd., with roles progressing Technical Lead → Senior Technical Lead → Technical Architect → System Architect across Google My Business, Google Maps, Stadia, Chromecast, and gTech Ads Scaled Services.

- Headed an 8-member front-end team; led architecture and delivery across Google My Business, Google Maps, Google Stadia, Chromecast, and gTech Ads Scaled Services.
- Designed and built the Google Maps "Follow" button, following/followed counters, business-profile cards, reusable rendering templates, and dynamic feed components — integrated into Google Maps and Google My Business.
- Led front-end module development for Google Stadia cloud-gaming and Chromecast streaming platforms, ensuring high-performance consumer experiences.
- Built API-driven, Python-based automation systems for gTech Ads Scaled Services (API → PL → UI architecture); automated reporting, campaign management, and analytics tools improving efficiency across global ops teams.
- Served as Certified Google JavaScript Code Reviewer; enforced Google engineering, accessibility, and usability standards. Acted as Scrum Master and technical liaison across distributed teams using Angular, React, Google Wiz, and Material Design.
- Awards: HCL Most Valuable Player (Mar 2017), HCL Innovation Award (Jan 2016), Google Best Team Player (Jul 2015).

Senior Interactive Developer L1 — Target (Vendor through Publicis Sapient Consulting Pvt. Ltd.) — Bangalore, India *Nov 2010 – Jun 2014*

Target — Fortune 500 general-merchandise retailer. Engaged as vendor through Publicis Sapient Consulting Pvt. Ltd., covering the \$1.8B Everest Redesign Project migrating Target.com from Amazon-hosted infrastructure to Target's own platform.

- Led front-end engineering for Target.com's \$1.8B Everest Redesign — migrating from a white-labeled Amazon-hosted platform to a modern, fully-owned e-commerce infrastructure.
- Primary implementer of guest account management, cart, and checkout modules — the core transaction engine serving millions of shoppers — including client-side validation, state management, and secure payment pipelines.
- Unified multiple vendor back-end systems into a cohesive front-end; redesigned checkout for flexible, error-tolerant navigation; implemented Address Verification System (AVS) UIs to reduce fulfillment failures.
- Led WCAG accessibility compliance across transactional modules; integrated behavioral analytics for data-driven UX optimization; ensured enterprise-grade payment security standards.

- Ensured full IE7+ cross-browser compatibility across all transactional modules using polyfills, conditional CSS, and progressive enhancement techniques — a critical requirement for Target's nationwide customer base.
- Led a 5-member Checkout & GAM sub-team. Within six months of launch: increased purchase completion, reduced checkout abandonment, improved fulfilment performance.
- Awards: Sapient Core-Value Award — Leadership (May 2013), Delivery (Aug 2012), Creativity (Jul 2011); Target Great Team Card (Dec 2011).

UI Lead / Web Developer — Ashan Consulting Pvt. Ltd. — Chennai, India *Jun 2009 – Sep 2010*

- Led a team of HTML coders, graphic designers, and presentation-layer scripters delivering consumer and social-community platforms: GroupDeal, Isocial, Discuz, Channel, Rayzz, and Volume.
- Ran prototyping cycles, UX testing, design reviews, and formal usability validation; worked directly with product managers and clients to translate requirements into UI solutions.

Web Developer — VirtualMaze Softsys Pvt. Ltd. — Chennai, India *Jun 2007 – May 2009*

- Developed and maintained company web properties end-to-end using PHP, MySQL, HTML, CSS, and JavaScript with full IE6+ cross-browser compatibility.
- Managed game updates, forum administration, security management, and SEO optimisation across company web properties.

KEY PROJECTS

Curelight — National Vaccine Finder & Inventory Platform *Castlight Health | 2020–Present | React, TypeScript, Node.js, GCP, CDC APIs | 100M+ users*

- Architected a self-service provider portal enabling vaccine suppliers to upload and manage real-time inventory data across 50,000+ healthcare provider locations and 14 major pharmacy chains nationwide.
- Built and integrated a public-facing vaccine search tool with CDC Vaccines.gov; platform accumulated 100M+ visitors since January 2021 — directly supporting the U.S. government's COVID-19 vaccination response.
- Developed a policymaker reporting portal that compiles vaccine supply data, distribution trends, and provider delinquency reports; empowered public-health decision-makers with actionable, real-time insights.
- Designed scalable data pipelines and front-end infrastructure capable of processing millions of daily transactions at sub-24-hour latency, supporting high-demand public-health scenarios at national scale.
- Implemented secure scheduling and identity systems across the platform, improving overall application reliability by 45%+ and reducing enterprise employer onboarding time by two-thirds.
- Delivered WCAG 2.1 accessibility compliance across all user-facing experiences, ensuring inclusive access for diverse populations including visually impaired and differently-abled users.

Castlight Care-Navigation & Benefits Platform *Castlight Health | 2020–Present | React, TypeScript, micro-frontends, WCAG 2.1 | Millions of users*

- Led architecture and delivery of a personalized care-navigation platform supporting provider discovery, benefits comparison, cost transparency, and health-journey recommendations for employer-sponsored populations.
- Designed a modular micro-frontend architecture and reusable component library adopted across multiple product lines, significantly improving engineering velocity, modularity, and long-term maintainability.

- Drove performance optimization across the platform achieving measurable improvements in Core Web Vitals, page load times, and application responsiveness, directly enhancing user engagement and satisfaction.
- Integrated with backend data-science and personalization systems to surface contextual health recommendations, improving user adoption of preventive care services and provider engagement rates.
- Reduced enterprise client onboarding time by two-thirds through standardized integration patterns, configuration-driven UI components, and improved deployment automation pipelines.
- Ensured HIPAA compliance and enterprise-grade security across all user data flows; collaborated with security, legal, and compliance teams to maintain rigorous data-protection standards.

Google Maps — Follow Button & Social Commerce Layer *Google via HCL | 2018–2020 | Google Wiz, Angular, Material Design | Millions of businesses*

- Designed and built the interactive "Follow" button and following/followed counters with real-time state management — a new social engagement layer enabling consumers to follow businesses they care about across Google Maps.
- Developed business-profile cards, reusable rendering templates, and view models that power the dynamic content feed architecture, enabling businesses to publish updates directly to engaged followers.
- Architected and deployed the complete content-delivery layer integrating with Google My Business, transforming Google Maps from a navigation tool into a social-commerce discovery platform for millions of local businesses.
- Resolved complex rendering issues across the feed architecture to ensure seamless, high-performance delivery of dynamic content at Google's massive scale; mentored team members on scalable front-end patterns.
- Work directly adopted into Google Maps and Google My Business core applications — enabling non-search-based marketing, strengthening small-business digital presence, and driving measurable consumer engagement.
- Collaborated with Google PMs, UX designers, and backend engineers across multiple time zones to align feature delivery with Google's product roadmap and engineering quality standards.

Google Stadia & Chromecast — Consumer Streaming Surfaces *Google via HCL | 2018–2020 | Angular, Google Wiz, Material Design*

- Led front-end development of core UI modules for Google Stadia — Google's cloud-gaming platform — ensuring high-performance, low-latency consumer experiences for global gaming audiences.
- Contributed to Chromecast streaming UI components, building responsive, accessible interfaces that work seamlessly across a wide range of screen sizes and device capabilities.
- Built automated testing frameworks using Google's internal tooling to improve test coverage, accelerate release velocity, and reduce regression risk across the Stadia and Chromecast product surfaces.
- Mentored engineers on scalable component architecture and Google engineering standards; conducted code reviews ensuring adherence to accessibility, performance, and usability best practices.
- Participated in cross-team design and architecture discussions to define scalable UI patterns reused across Google's consumer streaming products, reducing duplication and improving consistency.

Google gTech Ads Scaled Services — S2 Automation Platform *Google via HCL | 2014–2018 | Python, Angular, Wiz, BigQuery, Google Internal APIs*

- Designed and implemented an API → PL → UI automation architecture for Google Ads Scaled Services, enabling the S2 Automation team to Discover, Design, and Deliver automation opportunities at scale across global operations.
- Built Python-based processing layers (PL) that slice and transform data from Google Ads APIs into structured, UI-ready datasets consumed by reporting, analytics, and campaign management dashboards.
- Developed internal reporting, campaign management, workflow quality, and analytics tools that automated previously manual processes, significantly improving operational efficiency across gTech Ads teams.

- Collaborated with Product Technology Managers (PTMs) and stakeholders across Google to identify high-impact automation opportunities, delivering solutions that reduced manual effort and improved data-driven decision-making.
- Served as Certified Google JavaScript Code Reviewer and Scrum Master for the S2 team; enforced Google engineering standards, accessibility guidelines, and usability best practices across all deliverables.
- Delivered scalable internal platforms using Angular and Google Wiz framework, enabling global operations teams to manage advertising workflows more efficiently and with greater accuracy.

Target.com Everest Redesign — Cart, Checkout & Guest Account *Target via Publicis Sapient | 2010–2014 | HTML5, CSS3, JS, jQuery, JSP, WCS | \$1.8B project*

- Played a leading engineering role in Target's \$1.8B Everest Redesign Project — the full migration of Target.com from a white-labeled Amazon-hosted platform to Target's own modern, high-performance e-commerce infrastructure.
- Primary implementer of the guest account management, cart, and checkout modules — the core transaction engine serving millions of shoppers — including client-side validation logic, state management, and secure payment pipelines.
- Unified multiple vendor back-end systems into a single, cohesive front-end experience; redesigned checkout flows for flexible, error-tolerant, step-based navigation that directly addressed historically high cart abandonment rates.
- Designed and implemented the Address Verification System (AVS) UI to reduce fulfillment failures and user input errors; integrated behavioral analytics tracking to enable continuous, data-driven UX optimization.
- Led WCAG accessibility compliance across all transactional modules, expanding inclusive access for visually impaired and differently-abled shoppers; implemented enterprise-grade security for all sensitive payment data flows.
- Within six months of launch: measurable increases in purchase completion rates, reduced checkout abandonment, improved fulfillment accuracy, and higher guest-account adoption — directly contributing to Target's successful migration away from Amazon's platform.

Ashan Technologies — Social & Community Platforms *Ashan Consulting | 2009–2010 | PHP, MySQL, HTML, CSS, JavaScript, jQuery*

- Led end-to-end UI development for six social and community-driven platforms — GroupDeal, Isocial, Discuz, Channel, Rayzz, and Volume — designed as Facebook- and YouTube-style consumer web applications.
- Managed and mentored a team of HTML coders, graphic designers, and presentation-layer scripters; oversaw delivery from wireframe through production launch, ensuring quality and on-time execution.
- Conducted prototyping cycles, user-experience testing, design reviews, and formal usability validation; worked directly with product managers and clients to translate business requirements into intuitive UI solutions.
- Implemented responsive, accessible, and cross-browser-compatible interfaces optimised for large consumer audiences; applied SEO best practices across all platforms to maximise organic discoverability.
- Built group-deal, social-networking, forum, and video-sharing features from scratch, combining UI development and professional-services delivery to ensure final product quality met client and user expectations.
